RELEVANT EXPERIENCE

Freelance Web Developer: *Fullstack Software Engineer* 01/2023 – 03/2023

- Designed and created two functioning websites for a local cargo company from start to finish using **Javascript, HTML5 and CSS (Bulma)**, following current design trends and optimizing the page's content for mobile and cross browser performance.
- Personally consulted clients with design suggestions and hosting recommendations in order to create a product that satisfied the client's needs and ideas for their business.

Movie Rating App (School Project): *Software Developer* 09/2022 – 11/2022

- Designed a functioning prototype in **Azure** for a movie rating website using **Javascript**.
- Developed the app's functionality to create a user, store users, store movies, search for movies, rate movies, and leave comments on the application.
